## REPORT OF THE REGENTS

---

Columbia, S. C., January 1, 1920.

To His Excellency, Robert A. Cooper, Governor:

The Board of Regents of the State Hospital for the Insane begs leave to submit the report of the Institution for the year 1919.

In making this report, the first since your Excellency became Governor, we desire to briefly review the recent history of the Hospital.

In 1915, on invitation of your predecessor, the Honorable Richard I. Manning, Dr. Arthur P. Herring made a survey of the Hospital for the purpose of ascertaining its needs. He recommended a program of development and repair which the General Assembly, at its regular session in 1915, adopted. This provided for an annual appropriation of one hundred and fifty thousand dollars, with which to carry out the plan. The appropriation has continued for the years 1915 to 1919, inclusive.

We had hoped to be able to complete the work, but when the World-War came on conditions changed. Later, when our own Government entered the war, everything became more or less demoralized, and the cost of labor and materials more than doubled. However, we are pleased to report that we have been able to complete the rebuilding of the plant for the white patients at Columbia, with the exception of the Taylor Building, which cares for the chronically disturbed white male patients. The work, as completed from year to year, has been set forth in our reports, but it is again summarized in the architect's report for this year.

In the first annual report this Board filed, it advised the segregation of the races and the transfer of the colored patients to State Park as soon as provision could be made for them. We suggest that it would be well for the General Assembly to consider this question at its approaching session.

We are anxious that the full plan outlined by the Herring report and adopted by the General Assembly be carried to completion. The State is definitely committed to this program, and it should not abandon nor lessen its efforts in carrying out the policy, even under present high cost of labor and materials. The needs of the class for whom provision is being made cannot be ignored. Should this policy

be carried out and the colored race transferred to State Park, the buildings they now occupy will be liberated, and, after being remodeled, can be used to meet the needs of the growing population of white patients for some time to come.

One of the urgent needs to be met at State Park is an adequate water supply. The Board has had a survey made to determine which would be the cheaper, to establish a plant at State Park or lay a line from the city of Columbia and procure water from this source. At the price the city of Columbia is at present getting for water from consumers beyond the city limits, it would be much cheaper to establish and maintain a plant at State Park. However, if the General Assembly could make some arrangement with the city for water at a reasonable rate, it is felt that this source would be preferable.

The profits from the farms have been very good this year. The farm and dairy reports show a profit of twenty-two thousand one hundred and ninety-seven dollars and twenty-eight cents. The fall vegetable crop was again ruined by the drought which prevailed in this section. As this happens so frequently, we have been led to study irrigation as a means of insuring a regular vegetable crop for the Hospital. Fresh vegetables the year round are essential to the health of the patients, and it is believed that a properly installed irrigation system would enable us to provide vegetables, and that it would prove a considerable economic value to the State.

We would respectfully direct your attention to the unusually low death rate shown in the report of the Superintendent. This is most gratifying, and yet it is to be noted that it has contributed to the increased permanent population, and, consequently, to the increased cost of maintenance.

Another contributing cause to the increased cost of maintenance is the high wages paid by the Government at Camp Jackson and our being forced to meet the raise. However, many of our employees left, and we were able to retain only a very small force of mechanics. Consequently, a great deal of work which should have been done in 1918 was left undone until 1919, when the labor situation was relieved to some extent.

The world conditions led us early in the year to anticipate unrest in the coal industry, and we laid in a supply of coal, which it is estimated, will run us through March, 1920. It would seem a wise policy for the Board to regularly purchase coal in the spring so that it can be delivered during the summer.

We regret to have to report a deficit of \$141,560.73 for the year 1919. No one is to blame. We have worked in the shadow of it the entire year, for it is the result of the steadily increasing prices of most of the items of food and clothing we use. We strove to prevent it by making every effort to buy supplies at the lowest possible prices. We sought bids from various markets throughout the country and from the surplus supply officers of the Army and Navy of the United States. The intelligent public, however, needs no explanation, as everyone is aware of the increased cost of all the necessities of life.

We invite attention to the table of prices, found elsewhere in the report, for this and the three previous years, to which we have added prices for the past quarter. These go into the 1919 average, but are much higher on many of the items.

While the cost of living in common parlance has doubled since 1914, the following is our daily per capita cost for each of the six years:

1914—48c,  
 1915—47c,  
 1916—52c,  
 1917—54.3c,  
 1918—65.2c,  
 1919—82.05c.

We do not refer to this table by way of apology. We have been economical, but have tried to provide for the inmates as fully as the means at our disposal would allow. The increased population and constantly increasing prices of supplies of all kinds necessitates increased appropriations for this institution.

In submitting this, our first report, to you, we desire to express our deep appreciation of your Excellency's special interest in the Hospital, and cheerfully pledge you our hearty support and earnest efforts in behalf of those treated and cared for in this institution.

We congratulate your Excellency upon the adoption by the General Assembly of the Budget System as proposed by you. We believe it a wise step, and that under this plan the General Assembly will be enabled to legislate more intelligently and economically.

We wish to record our appreciation of the spirit of co-operation with which we have been met during the year by the various State

Officials and Departments, and to particularly express our thanks to the Board of Charities and Corrections and its Secretary for valuable help and suggestions.

Respectfully submitted,

R. B. SCARBOROUGH, Chairman;  
CHRISTIE BENET,  
F. H. McLEOD, M. D.,  
A. W. REYNOLDS,  
J. E. SIRRINE,

Board of Regents, State Hospital for the Insane.

# REPORT OF THE SUPERINTENDENT

Columbia, S. C., January 1, 1920.

To the Board of Regents, State Hospital for the Insane, Columbia, S. C.

Gentlemen: In accordance with your requirements, the ninety-sixth Annual Report for the year ending December 31, 1919, is herewith respectfully submitted.

The statistical tables as used in this report are in compliance with those formulated by the Committee on Statistics of the American Medico-Psychological Association in collaboration with the Bureau of Statistics of the National Committee for Mental Hygiene, however, as the population of this Hospital is about equally divided between white and colored, it is thought advisable from a standpoint of comparative study to divide the tables into white and colored.

## GENERAL STATISTICS FOR THE YEAR ENDING DECEMBER 31, 1919.

	White Males.	Colored Males.	White Females.	Colored Females.	Total.
Patients remaining December 31, 1918.....	548	562	641	437	2,188
Admitted during the year.....	296	224	272	227	1,019
First admissions .....	227	188	211	186	812
Readmissions .....	69	36	61	41	207
Total admitted during the year.....	296	224	272	227	1,019
Total under treatment during the year.....	844	786	913	664	3,207
Daily average population.....	551	621	533	434	2,139
Discharged during the year.....	179	133	166	111	589
As recovered .....	49	58	47	61	215
As improved .....	57	48	73	41	219
As unimproved .....	27	11	21	4	63
As not insane .....	46	16	25	5	92
Died .....	70	84	56	68	278
Total discharged and died during the year.....	249	217	222	179	867
Remaining under treatment.....	550	530	644	456	2,180
Number home on parole, etc., December 31, 1919.....	46	40	45	28	159
Total remaining on books December 31, 1919.....	596	570	689	484	2,339

## ADMISSIONS.

There were 2,180 patients in the Hospital at the close of the year, December 31, 1919, which is an increase of 159 over the number remaining in the Hospital December 31, 1918. There were 1,019 patients admitted during the year, an increase of 18 over the number admitted last year. Of those admitted 812 were first admissions and 207 readmissions.

Dementia Præcox was the psychosis occurring most frequently in the first admission cases. This psychosis was diagnosed in 34.8% of the cases originally admitted. The second largest group is made up of Senile cases. This psychosis was diagnosed in 11.8% of the first admissions. The table representing the diagnostic groupings of readmissions shows that Dementia Præcox was the most frequent type of psychosis being diagnosed in 42.5% of these cases. Manic Depressive, the second largest number, was diagnosed in 21.6% of the readmissions. There were 144 cases admitted not regarded as insane. These cases are comprised principally of drug cases, epileptics and mental defectives without psychosis.

## DISCHARGES.

Five hundred eighty-nine (589) patients were discharged during the year. Of this number 36.5% were discharged as recovered; 35.4% as improved; 10.7% as unimproved, and 15.4% not insane.

## DEATHS.

During the year 70 white males, 56 white females, 84 colored males and 68 colored females, or a total of 278 died. The ratio of deaths based upon the whole number treated is 8.6%. As may be observed from a comparative study of former reports, there has been a marked reduction in the death rate during the past year. Factors to be considered as contributing to this reduction are fewer pellagrins admitted, nonoccurrence of epidemics or serious accidents of any kind and improved physical condition of the Hospital. This last factor is, no doubt, of far-reaching importance, for it is a well established fact that proper sanitation is one of the most valuable assets in promoting good health. The table of deaths reveals the fact that 90 died who were over sixty-five years of age, 91 died who were in the Hospital less than one month. This is in keeping with the reports of previous years showing that the Hospital is frequently called upon to treat patients in a moribund condition and to care for a large number of senile cases.

## GENERAL HEALTH.

There has been a constant effort throughout the year, as in former years, to safeguard, as far as possible, against the occurrence of accidents, epidemics and other conditions that might impair the general health of the patients. Other than the epidemic of Influenza that was mentioned in last year's report, and which continued until about the first of February, 1919, the Hospital has not been visited by any epidemics, nor have any suicides or serious accidents occurred. This is rather remarkable when we take into consideration the overcrowded condition of the Hospital and the shortage of nurses and attendants.

It is with deep regret that I report the death of Miss Susie Elliott, a member of the junior class of nurses. Miss Elliott died on the morning of January 17th from general peritonitis caused by pneumococcic infection. Miss Elliott was considered as one of the brightest members of her class and the occurrence of her untimely death caused a great wave of sorrow throughout the entire Hospital.

## MEDICAL WORK.

The Medical Department, which is divided into four units, is under the supervision of the Medical Director, Dr. J. F. Munnerlyn. A physician is in charge of each unit and is responsible to the Medical Director for the care and treatment of the patients under his charge, the sanitary conditions of the buildings and the discipline of the employees.

During the year there were three thousand two hundred and seven patients treated. As these patients are admitted they are placed in bed on the receiving ward, where careful observation and study of the case is made. When the examination is completed, the patient is presented at Staff Meeting. Here a diagnosis is made and such treatment outlined as may be indicated in each individual case. There were nine hundred and seventy-five cases presented at Staff Meeting for consideration during the year.

The Hospital is still called upon to care for a large number of patients suffering from some form of physical trouble, such as pellagra, toxæmia of some form, diseases of the circulatory organs, renal diseases and not a few others from some form of organic disease of the nervous system. Not infrequently these cases are brought to the Hospital in a moribund condition, practically beyond the bounds of medical aid.

Six of the white male wards are in charge of graduate female nurses. This change has worked so successfully that it is hoped within a short while to have female nurses in charge of practically all of the male wards. Negro female attendants have also been placed in charge of some of the negro male wards.

Hydrotherapy in treating disturbed cases has received much attention during the year. We have six continuous baths in the institution, two for white males and four for white females, which were used to a considerable extent. In addition to this a number of patients were treated in hot and cold packs. The value of hydrotherapy in treating disturbed cases is frequently clearly brought out in the testimonial of patients who attribute their improvement to the quieting effects of the continuous bath or warm pack. The warm water of the continuous bath is the best sedative treatment we have for this class of patients. It produces the desired effect without any clouding of consciousness or other disagreeable features. About fifteen patients are treated daily by one of the forms of hydrotherapy and the results have been very gratifying.

#### REPORT OF LABORATORY.

The laboratory work, under the direction of the Pathologist, Dr. E. L. Horger, has made very satisfactory progress during the year. Owing to the fact that the medical staff continues to be small, it has been necessary for Dr. Horger to devote much of his time to psychiatric work. Mr. H. C. Allison, assistant to the Pathologist, has devoted his entire time to the laboratory work, and the study of Laboratory Table will show that there has been a material increase in the amount of the work done this year as compared with that of last year.

Effort is made to make a routine urinalysis and blood Wasserman on every patient admitted. In addition to this, special tests are made on feces, stomach contents, blood and spinal fluid. During the year 950 blood Wasserman tests were made. Of this number the percentage of positive reactions was as follows: White male, 11%; white female, 5%; colored male, 20%; colored female, 20%. There is very little variation in these figures and those of the past four years, showing that syphilis is twice as prevalent among the negro patients.

Fifty-six autopsies were performed, which is a greater number than that of any previous year. Specimens of all of the organs are sent to the Laboratory and tissue examinations made. This is a

very valuable aid in arriving at a definite conclusion with reference to diagnoses in a number of cases which otherwise would remain obscure.

### DENTAL WORK.

The system as outlined in former reports with reference to making a routine dental examination of all patients admitted to the Hospital has been carried out during the year in every case except those who are so badly demented that they were unable to co-operate with the examiner. Dr. W. P. McMeekin visits the Hospital every morning for the purpose of making these examinations and administering treatment wherever indicated. During the year one thousand seven hundred and fifty-nine patients were examined, one thousand three hundred and seventeen amalgam fillings put in, one thousand and sixty-one extractions and five hundred and sixty-four treated for other conditions. It is amazing to note the marked improvement that frequently takes place in the physical condition of patients, who come to the Hospital with badly diseased gums and teeth, after they have been properly treated. Good teeth are essential to good health, so, in order to give the mentally sick patient every possible chance for improvement, every effort is made to place him in good physical condition.

### OCCUPATIONAL THERAPY.

Occupational therapy as a supplement to the medical treatment of the mentally sick patient is now being used much more extensively than heretofore. Effort is made to get every patient admitted to the Hospital, who is physically able to work, interested in some form of occupation. The work, so far, has been used largely for two classes of patients; that is, those who may be re-educated and trained to become better members of the Hospital population, and those who may be returned to community life. The former class comprise the badly deteriorated cases who are usually regarded incurable. If these patients are left alone to spend their time in idleness, the deterioration continues, they lose interest in themselves, develop filthy and untidy habits, the result being that a number of them often lead a most miserable existence. With suitable occupation, the majority of these patients can be greatly benefited; they become less destructive and untidy, and while they may never improve sufficiently to leave the Hospital, they are trained to become better members of the Hospital population.

Occupation as applied to the second-class of patients ; that is, those who are regarded as curable cases, is of paramount importance, inasmuch as it aids in the return to the normal and serves to make the patients more contented during their Hospital residence. It hastens the return of a diseased mind to its normal state by arousing the interest of the patient, promotes confidence, and keeps his mind from introspection. Reference to Table of Occupation will show the number of patients employed and the kind of work they are engaged in.

The department of occupational therapy is under the supervision of Miss Mary Maupin. This work was formerly under the supervision of Miss Mary Dillard, who resigned last year to enter war work. Since being here, Miss Maupin has organized a number of classes and the work is now progressing in a very creditable manner.

### AMUSEMENT AND DIVERSION.

Owing to the fact that amusement and diversion are so closely related to occupational therapy, special effort is made to develop this phase of the Hospital life to the fullest extent. Games of some kind frequently arouse the interest of patients when everything else fails, and not infrequently a patient, who has shown marked emotional deterioration, will begin to show striking evidences of improvement as the result of an awakened interest stimulated by some form of amusement. Occupation and amusement are important factors in combatting mental disorders. This fact is substantially corroborated by the statement of a patient who was discharged from the Hospital a few months ago. He says: "I am truly grateful to the Hospital authorities for getting me interested in baseball—it did more for me than anything else. After going out on the ball field a few times, I began to take a new lease on life and I attribute the greater part of my restoration to an awakened interest stimulated by the game."

During the spring and summer months, the patients were allowed to participate in baseball games practically every afternoon. The Hospital team was a member of the City League and every Saturday afternoon match games were played for the benefit of the patients. It is gratifying to report that the Hospital team won the pennant.

The weekly dances which are given for the entertainment of the patients are largely attended and enjoyed. Music for these dances is furnished by the Hospital Orchestra. The Hospital Band also gives numerous open air concerts at the ball games and in the exercise yard for the patients during the summer months.

When the weather is not too cold, groups of patients are taken for long rides in the country by the Hospital truck and this is probably one of the most popular forms of diversion.

Every Friday afternoon, all patients attending the occupational classes are given a party, where games are indulged in and refreshments served.

A large number of patients attended two circus parades and also a number of military parades that were given during the year.

Through the kindness of the officials of the State Fair Association about two hundred patients visited the Fair.

On the evening of December the 23d a minstrel show, given by the Doctors, attendants and patients, furnished considerable amusement for a large audience of patients.

Probably the crowning feature of the year in sports was Field Day. This is an occasion that is always looked forward to with much pleasure. On the afternoon of October 17th about five hundred patients assembled on the athletic field and watched with keen interest the carrying out of a carefully arranged program, consisting of races, jumping contests and various other forms of athletic sports.

### RELIGIOUS SERVICES.

Religious services, under the direction of the Hospital Chaplain, Rev. J. C. Abney, have been conducted every Sunday morning at 9:30 o'clock. These services are held in the Hospital Chapel, they are always well attended and every patient who is able to appreciate the nature of these meetings is urged to attend. The orderly manner in which these meetings are conducted and the intense interest manifested by a number of the patients would make it difficult for an outsider attending one of them to distinguish between these services and services of a similar nature on the outside. In addition to conducting these meetings, the Chaplain visits the wards from time to time, and, in a general way, looks after the religious interests of the patients. When patients are buried in the Hospital cemetery, the funerals are attended by the Chaplain, who administers the rights of a Christian burial.

### CHANGES IN MEDICAL STAFF.

The difficulty of obtaining a sufficient number of physicians to properly carry on the medical work as experienced in 1918 has improved but little during the past year. It was hoped that physi-

cians returning from the Army and Navy might be interested in this kind of work, but as experienced throughout the country, very few of them are attracted by State Hospital work. The Hospital is, however, fortunate in being able to retain the services of a Staff adequate enough to look after the more essential needs of the patients. The matter of research work and after-care treatment has been practically out of the question.

Dr. R. H. Folk, formerly a member of the Staff of the University of Maryland Hospital, was appointed Assistant Physician on February the 15th. Dr. Folk is in charge of the colored male service.

Dr. J. M. Beeler was appointed Assistant Physician on March 25th. Dr. Beeler is in charge of the white female service. He was formerly a member of the Staff of the Connecticut State Hospital.

Dr. Walter Boone was appointed intern July 25th. Dr. Boone resigned August 14th to take up rural sanitation work.

Dr. Catherine Munro was appointed Woman Physician October the 22d.

On June 1st Dr. O. F. Hogan resigned to enter general practice.

Dr. J. E. Boone resigned November 1st to enter general practice.

### TRAINING SCHOOL FOR NURSES.

No phase of the Hospital work during the past year has caused more concern than that of supplying the training school with an adequate number of pupils. The marked falling off in the attendance, which seems to be a prevailing condition in practically all training schools, is due principally to the fact that so many women who took positions that men held when called into the service are still holding them. These positions pay good salaries, so that those engaged in this kind of employment are not attracted by the meagre salaries paid nurses while in training. It is, nevertheless, gratifying to report that while the classes are smaller than usual, the training school, under the supervision of Miss Elizabeth Clinkscales, continues to operate in active form.

The importance of good nursing in caring for the insane can not be overestimated as much depends upon the proper handling of the patients by nurses especially trained in this kind of work.

Miss Mae Lowe, formerly connected with the Rhode Island State Hospital, was appointed Assistant Supervisor of Nurses March 8th.

The graduating exercises for the class of 1919 were held in the Amusement Hall May 28th, 8:30 p. m. There were sixteen graduates. The following program was carried out:

Prelude.

Prayer ..... *Rev. J. C. Abney*  
Chaplain of the Hospital

Address to Graduating Class ..... *Rev. R. S. Truesdale*  
Pastor Main Street Methodist Church

Music.

Awarding Diplomas ..... *Hon. Christie Benet*  
Member Board of Regents

Music.

Benediction.

## INCREASED COST OF MAINTENANCE AND SHORTAGE OF HELP.

The year, from a financial standpoint, has been a strenuous one, presenting many problems of great perplexity and difficult of solution. With the ending of the war, it was hoped that the cost of living would be reduced, that the price of necessities, food, fuel and clothing would gradually drop to what, before the war, was considered normal. Instead of prices decreasing, there has been an approximate increase of 30% in the cost of practically all of the necessities of life.

The daily number of patients under treatment has shown a material increase over that of last year, a condition that was brought about by the large reduction in the death rate.

Early in the year, in order to retain a sufficient number of officers, nurses and attendants, and such help as is generally needed in the various departments to properly carry on the work of the Hospital, it was necessary to increase their salaries.

Rigid economy, retrenchment and reductions in waste, methods that are employed in trying to cope with the situation, have received special attention during the year. However, with an increasing number of patients to care for, advance in the cost of necessities and higher wages paid employees, it has been practically impossible to conduct the affairs of the Hospital in a manner that the patients receive proper attention and consideration without the occurrence of a deficit. Two problems that are to be considered in the management of every institution of this kind, one the economic, and the other the humanitarian, are both important questions and should receive close attention and study. Just how far we are justified in

economizing with reference to caring for the patients is a question that would, no doubt, vary greatly in the minds of the general public. It would seem, however, to be a matter of poor economy to stint the needs of a suffering humanity in order to make a flattering financial report.

The difficulty of procuring sufficient help to properly carry on the work of the Hospital as experienced in 1918 has improved only among certain classes of employees. Since the war, male attendants have become more plentiful, but in spite of this, it was impossible to keep a sufficient number of them in the services of the Hospital until their salaries were increased. The greatest difficulty experienced in procuring help is among the white female employees. There has been a marked reduction in the number attending the training school and also those working as attendants. As stated before, it is thought that this is due principally to the fact that women who took positions men held when called into the service are still holding them.

#### IMPROVED PHYSICAL CONDITION.

The work of remodeling under the supervision of Mr. J. W. Rutherford has made satisfactory progress during the year, although, on account of the difficulty of securing building material and sufficient help, not as much has been accomplished as had been planned. The work for the year has been confined to remodeling the white female wards, and it is expected that within a few weeks this entire service will be completed and ready for occupancy. During the year the fourth, fifth, sixth, twelfth, and the fourth, fifth, sixth and ninth annexes were finished and occupied. The work on the remaining wards of this service, the first, second, third and the Talley Building, is well advanced. Remodeling these wards means that they are made into new apartments, there is nothing left of the old, except the brick frame of the main building, the entire interior is new. The wards are especially designed for meeting modern requirements of caring for the insane, they are well ventilated, attractive and comfortable.

All of the female patients are now occupying new quarters, except eighty-five of the more disturbed cases, who are being cared for temporarily in the Old Building. Within a short while, these patients will be transferred to the Talley Building, which is being remodeled and equipped specially for handling disturbed cases.

The results of this improved physical condition with reference to the conduct and appearance of the patients are still very evident. Patients who were formerly disturbed and untidy become less so when placed in these new quarters, which seems to be an effort on the part of the patients to harmonize with their improved environment.

### DAIRY.

The dairy, under the management of Mr. A. T. Martin, continues a great asset to the Hospital. Steady progress is being made in building up a pure bred herd of Holstein cattle. A much better showing would have been made, but in testing the herd for tuberculosis during the spring twenty-three reacted. These were immediately removed from the dairy, and the barn thoroughly cleansed and disinfected. A retest was made in July, at which time fifteen reacted positively and two suspiciously. The same precautions were again taken, and it is hoped that the disease is now eliminated. The original test and retest were made by officials of the United States Department of Agriculture, and as soon as the herd is free it will be eligible for registration with the Department at Washington, which is much desired, as it will materially aid us in selling cattle to good advantage in other States. Retesting for tuberculosis will continue to be made at regular intervals, for by this means only can one be sure that tuberculosis does not exist.

As the result of so many cows reacting and removing them from the herd, the milk supply of the Hospital was materially diminished. Some of the cows were replaced by grade cows, but not a sufficient number could be bought to bring the milk supply up to normal, and it has been necessary to purchase milk powders as a substitute for whole raw milk for cooking purposes. With many young cows coming fresh soon, it will not be a great while until the milk supply will again be up to normal.

There has been no trouble in disposing of all surplus pure bred bull calves, ranging in price from one hundred and twenty-five dollars to five hundred dollars. As soon as the herd is built up to full capacity (one hundred cows), it is believed that the sale of surplus cattle will prove a considerable source of income to the Hospital.

## FARMS.

The farm reports show good profits for the year, although the fall vegetable crop was a complete failure throughout this section on account of the prolonged drought. Experience for the past few years would indicate that the successful growing of truck cannot be accomplished without the aid of a proper irrigation system. In order to obtain all the information possible on this point, the Board of Regents invited Mr. H. R. Pulitzer, an experienced truck grower, of Beaufort, to visit the Hospital, make a survey of the farms, and make such suggestions as he thought would obtain the best results. He advises that the rainfall, even with the most suitable soil, is too uncertain for the successful growing of truck, and strongly recommends that ten acres be provided with an overhead sprinkler system of irrigation. He feels that to supplement the present method of growing truck with ten acres properly irrigated and farmed intensively sufficient vegetables can be grown to meet the needs of the Hospital the year round. This would be not only a great help to the dietary, but it is believed that it would prove of considerable economic value to the Hospital, and it is earnestly hoped that funds will be provided by the General Assembly for this purpose.

A considerable part of the profits of the farms for the year has been due to the successful raising of swine. Approximately five hundred head have been raised, and before the season is over will be butchered or put on the market. Preparations are being made to further extend the enterprise next year.

No changes have been made in the farm management, Mr. A. F. Fowler is manager of the Columbia farm, and Mr. G. J. Cooper and Mr. Victor Price are managing the Moore and Pell farms at State Park.

## ACKNOWLEDGMENTS.

I desire to acknowledge and express my appreciation for several cash donations from friends of the Hospital, sent in at Christmas time for the pleasure of the patients, also magazines, papers and books sent in from time to time during the year.

To the members of the Medical Staff, the official force, and all other employees, I wish to express my thanks for the loyalty of their support, co-operation and faithful performance of their duty. I also wish to thank the consulting staff for their many visits to the

Hospital and the valuable service they have rendered. I again wish especially to express my appreciation to you, the Board of Regents, for the confidence, advice and encouragement given me, and the untiring interest you have shown in the welfare of the Hospital.

Respectfully submitted,

C. F. WILLIAMS, M. D.,  
Superintendent.

## STATISTICAL TABLES

# TREASURER'S REPORT

December 31, 1919.

C. F. WILLIAMS, M. D., Superintendent.

Dear Sir: In submitting our Annual Report for the year 1919, and referring to the deficit of \$141,560.72, we respectfully call your attention to the attached schedule of prices showing a comparison between the years 1916, 1917, 1918, 1919 and the last quarter of 1919. Please note the increase in the price of Sugar, Dairy products, Pork products, Beef, Dried fruit, and Clothing over 1918. Please note also the increase in the prices for the present quarter over the 1919 average.

This increase in prices, the increase in salaries to Nurses, Attendants, and Employees generally and the increase in the number of patients cared for are the reasons for this deficit.

Yours respectfully,

H. T. PATTERSON, Treasurer.

## GENERAL INFORMATION.

December 31, 1919.

1. Date of opening as an institution for the insane.....December 18, 1827  
(Date of founding of the Institution, December 21, 1821).
2. Type of Institution.....State
3. Hospital plant.  
Value of hospital property:  
Real estate, including buildings.....\$1,923,105.17  
Personal property ..... 260,071.21  
Total .....\$2,183,176.38  
Total acreage of Hospital property (including grounds,  
farm and garden and sites occupied by buildings).....2,730.61  
Acreage under cultivation during previous year..... 695.00
4. Medical service.  

	Men	Women	Total
Superintendents .....	1	.....	1
Assistant physicians .....	5	1	6
Medical interns .....	1	.....	1
Clinical assistants .....	.....	.....	.....
Total physicians .....	.....	.....	8
5. Employees on pay roll (not including physicians)  

	Men	Women	Total
Graduate nurses .....	.....	22	22
Other nurses and attendants .....	63	67	130
All other employees .....	100	49	149

6. Patients employed in industrial classes or  
in general hospital work on date of report..... 567 474 1041
7. Patients in institution on date of report  
(excluding paroles) ..... 1080 1100 (2180)

## FINANCIAL STATEMENT.

For the Fiscal Year Ending December 31, 1919.

1. For maintenance of patients:		
Balance on hand from previous fiscal year.....	None	
From appropriation 1918 deficit.....	\$ 60,402.43	
From appropriation 1919.....	485,000.00	
From paying patients.....	14,046.75	
From 1919 deficit.....	<u>\$141,560.72</u>	
Total receipts for maintenance.....		\$701,009.90
2. For all purposes other than maintenance, including new buildings, additions, improvements, etc.:		
Balance on hand for previous fiscal year.....	\$ 31,666.66	
From appropriation, 1919.....	<u>150,000.00</u>	181,666.66
Total receipts .....		<u>\$882,676.56</u>

## DISBURSEMENTS.

## 1. Expenditures for maintenance of patients:

1918 deficit .....	\$ 60,402.43
Salaries and wages .....	173,805.04
Provisions .....	211,634.49
Farm, garden and dairy .....	56,030.98
Clothing .....	56,837.86
Furniture and furnishings.....	63,709.70
Fuel and light .....	52,423.35
Ordinary repairs and shops .....	9,343.18
Medical supplies .....	6,582.61
Transportation of patients .....	497.76
Miscellaneous, including general supplies, lawns, roads, grounds, etc .....	9,742.50

Total expenditures for maintenance..... \$701,009.90

## 2. Expenditures for all purposes other than maintenance including new buildings, additions, improvements, etc.....

\$166,006.00

Total expenditures ..... \$867,015.90

Amount returned to State Treasurer or other officials .....

None

Balance on hand at close of year "other than maintenance" .....

\$ 15,660.66

Total disbursements, including balance on hand .....

\$882,676.56

While this balance (\$15,660.66) has not been paid out, yet we have contracted for additional material and labor amounting to \$20,641.18, which is \$4,980.52 in excess of the balance remaining unpaid referred to.

Average population for 1919..... 2,139

Average annual cost per patient..... \$299.49

Average daily cost per patient..... .8205

## REPORT OF ARCHITECT

---

Columbia, S. C., December 16, 1919.

To the Board of Regents, State Hospital for Insane, Columbia, S. C.

Dear Sirs: A report of the progress made upon the development and repairs to the buildings and their equipment is herewith submitted.

In previous reports the general plan of reconstructing and developing the buildings of this institution were given. The development contemplated the segregation of the races, the while patients were to remain at Columbia and buildings were to be provided at State Park for the colored patients.

The institution at Columbia was first to be developed along the general plan adopted and after these developments had been completed new buildings were to be erected at State Park.

A thorough study was made of the best and most economical method of administering to the patients and the buildings and equipment were planned to meet these requirements.

The old buildings were not properly arranged or equipped to meet the conditions required in a modern hospital for the care of the insane. The physical condition of the old buildings, as previously reported, was in a very poor condition and the equipment was inadequate and deteriorated.

In order to properly arrange and equip the buildings and to restore them to a first-class condition it was necessary to practically rebuild all of the old buildings, to build such new buildings as was necessary and to provide all new equipment so as to make this institution as a whole a modern and complete plant for the proper care and treatment of the patients committed to it. A general plan of the physical development was adopted in 1915 and each year work has been advanced towards the completion of this plant. The execution of the work has not been as rapid as was contemplated. This has been due to two difficulties: first, the cost of labor and materials has rapidly advanced since the work was started; and, second, in developing the wards it was not possible to get access to more than a limited amount of the old buildings so as not to seriously overcrowd or inconvenience the patients. It was hoped that the buildings at Columbia would be completed this year, but the appropriation was

not sufficient on account of the advance in the prices of labor and materials, and also due to the fact that expenditures were necessary that was not contemplated.

Since work upon the development and repairs of this institution was begun in 1915 there has been a tremendous amount of work done, and to attempt to detail this in a report would prove too voluminous. All of the general plan adopted has been carried out, with the exceptions as hereafter made, as well as numerous other improvements and additions that became necessary. Attention is directed to previous reports and to the following statement of the buildings and improvements completed, which, in a general way, will give an idea of the various work accomplished, all of which was necessary to carry out the plan to make this institution thoroughly arranged and equipped to properly care and treat the patients in a most economical manner. There are a great many other improvements and additions that would be desirable, but only those that were necessary were contemplated and provided.

The following buildings contemplated in the general plan of development have been completed:

- Administration Building.
- Male Wards, Main Building.
- Female Wards, Main Building.
- North Building.
- Talley Building.
- Tuberculosis Pavilion.
- Male Congregate Dining Room.
- Female Congregate Dining Room.
- Nurses' Home.
- Dairy Barn and Dairyman's Cottage.
- Calf Barn.
- Bakery.
- Laundry.
- Central Boiler Plant and Stack, including the heating and ventilating of all buildings developed.
- Transformer House, including electric lighting and power for all buildings developed and for yard lights.
- Central Kitchen and Storeroom, including Refrigerating Plant.
- Medical Director's Residence (renovated).
- Treasurer's Residence (renovated).
- Manager's Residence (renovated).
- Potato Houses.

Comfort Station in yard.

Greenhouse.

Grandstand and Athletic Field.

Fire Station and Equipment.

Intercommunicating Telephone System.

New System of Plumbing Parker Building.

Improvement to drainage, roads, sewer and water systems and fences.

## STATE PARK

---

Temporary Dining Room and Kitchen.

Water Supply.

Feed Barn.

Farm Houses.

Silo for future dairy barn.

The method adopted for the execution of the work has been most economical and has resulted in the work being done as cheaply as consistent with good work. The construction foreman has handled the work with considerable executive ability, and has at all times been able to keep the best labor at a cost favorable to the institution. In planning the work the construction and equipment provided was that which was most durable and proper in each instance, and in that respect the work was not cheap but permanent.

At the time the reconstruction was begun the cost of labor and materials were very low as compared with the present prices. The advance has been very great from year to year, and in order to show how this advance has retarded the development a statement is attached showing the prices for labor and materials. Not only is the price of labor and materials higher, but they are also scarce and difficult to get promptly. In 1915-16 considerable more work was done in less time than in later years. The development of the male wards which was done in 1915-16 was completed at a cost of \$1.63 per sq. foot; the female wards (which are identical as to construction and equipment) and built in 1917-18-19 cost on an average of \$3.18 per sq. foot, which will give an idea of the advance in cost for the years compared. The forces are now at work completing the last section of the Female Wards and the Talley Buildings, both of which will be completed in a short while. The only building that remains to be developed at Columbia is the Taylor Building, which cares for the chronically disturbed male patients. Provision should be made also for the construction of a vegetable house, paved walkways to the dining rooms and a high pressure steam line from the boiler house to laundry and kitchen.

The work accomplished during this year includes the completion of the Female Wards, the Talley Building, Calf Barn, Potato Houses and numerous other items of improvements.

To complete development of the buildings at Columbia an appropriation should be made to complete the Taylor Building and other items previously mentioned. An appropriation should also be made to begin work upon the construction of buildings at State Park for the colored patients.

In order to economically carry out these plans and to construct the buildings necessary to segregate the patients the appropriation should be sufficient to provide a water supply and build at least one of the buildings during 1920.

It will be necessary to provide buildings to accommodate two hundred and fifty women and five hundred and twenty-five men. It is suggested that one ward building be built for women and two buildings for men to accommodate three hundred each.

Respectfully submitted,

GEORGE E. LAFAYE,  
Architect.

## COMPARATIVE COST OF MATERIALS.

The following statement will show the advance of prices paid on a few of the basic materials purchased.

A large part of the material was purchased, manufactured and fabricated which cannot be directly compared, but the advance has been in the same proportion.

The majority of materials were purchased early in the year and the prices shown were the average prices paid. The market on all materials have advanced considerably during the year, and for comparison a statement of the present market prices is given. The indications are that the present prices will hold, but they may advance with the rush of building due in the spring.
